

Remove rust from metal

PROJECT 2

You'll need

Electric drill and brass bristle brush attachment, steel primer, paintbrush, enamel paint

STEP 1

Attach the brass brush to the electric drill and use it to remove the rust from the metal until the surface is shiny.

STEP 2

Dust off the object and apply steel primer to the affected area. Leave to dry. Clean the brush after use.

STEP 3

Use the clean paintbrush to apply paint in a colour of your choice.

Pink planter R4, Stodels. Plant R39, Starke Ayres. Mosaic candleholder R129, Sheet Street. Clay bowl similar to the one pictured R18, Khumbulani. Herb tray R56,95 and flowers in tin holders R29 each, Starke Ayres. Pigeonhole shelf R135, Die Gieker.

TIP:

REMOVE AS MUCH RUST STAIN AS POSSIBLE BEFORE APPLYING THE PRIMER.
