Cashbuild helps you keep warm this winter

EVERYONE wants to feel warm and snug in winter and for many people a luxurious bath is a highlight at the end of a chilly day. Imagine opening the hot water tap, adding a dash of your favourite bubble bath... then the shock of finding yourself in water colder than Jack Frost's jacket.

Geysers aren't a pleasant experience at any given time but during winter it's one of the worst let-downs.

Cashbuild takes your comfort very seriously. In fact they have become somewhat of a consumer champion in the geyser division. As the going gets tougher economically they reckon it's nice to know some things are constant and reliable – such as a good geyser. It's even better to know you can buy a quality geyser at an affordable price.

Cashbuild, South Africa's largest building materials retailer, leads from the front. They source their affordable products from reputable companies only. One such company is the Gauteng-based Franke Group – a world leader with more than 100 years' experience in providing a huge range of domestic products, including geysers, in 40 countries worldwide.

Sticking with the best is paying off for Cashbuild. Standard Bank Insurance Ltd recently appointed Cashbuild South Africa onto their panel of geyser suppliers. That means if you're covered by Standard Bank Insurance you'll be supplied with top-quality geysers carrying the Franke brand name if your current one bombs out on you.

Do you need more peace of

HOT STUFF

mind? If you install a Franke Supaflo geyser made from anti-corrosive stainless steel in your home, it comes with a five-year guarantee on the inner cylinder, a 24-month guarantee on the geyser valves and a 12-month guarantee on the electrical components.

■ **Call the Cashbuild helpline 0860-100-582 for more information.**

More info on the Franke range

■ The Franke Supaflo geyser is being manufactured exclusively for Cashbuild in 100-litre (R1 595), 150-litre (R1 695) and 200-litre (R2 695) capacity options.

■ The Franke standard dual geyser is available in 100-litre (R1 905), 150-litre (R2 065) and 200-litre (R3 225) capacity

options.
 ■ Supaflo geysers are guaranteed for four years and Franke standard dual geysers are guaranteed for five years.
 ■ In the unlikely event that anyone finds the same or comparable Supaflo geyser advertised and in stock elsewhere at a cheaper price, Cashbuild will refund the difference. □

HOT FACTS

- Choose a plumber who is registered with IOPSA (Institute of Plumbing South Africa) and SAIA (South African Insurance Association) to install your geyser.
- If you use an unqualified plumber to install your geyser you're not only putting your life at risk but your geyser won't be covered by insurance if it breaks down.
- In 2006 SAIA estimated that between 30 000 and 40 000 geysers were installed every month in South Africa, of which 65 per cent were replacements paid for by the insurance industry.
- This was costing the industry up to R300 million a year which is why SAIA encourages you to use registered and qualified plumbers.

Cashbuild will soon be launching Franke's solar assisted water heating system. A fully installed 150 litre system will cost approximately R10 000. Consumers will be able to get a refund to the value of approximately R2 000 from Eskom. Cashbuild and Franke are making the cost of these SABS compliant solar assisted water heating systems extremely affordable for a limited period.
