

## PROJECT 8 Install an exterior light

BEFORE

### WHAT YOU NEED

waterproof exterior light unit, lightbulb, 10 m electrical cord (twin and earth), electric drill, Bosch long masonry drill bits 10 mm, 6 mm, screws and plugs, power plug, poly saddles, hammer, screwdriver

### STEP 1

Connect the electrical cord to the light fitting according to the instructions on the pack.

### STEP 2

Measure and mark with a pencil where you want to install the light. Use the long masonry drill bit to drill a hole through the wall. Measure and mark with a pencil where the light fitting screws must go and drill smaller holes for them. Push the plugs into the holes.

Chair, jug and basin, stylist's own.

### STEP 3

Slip the electrical cord through the hole in the wall and screw the light fitting to the wall. Screw in the lightbulb and fit the glass cover on securely. Use poly saddles to lead the electrical cord to the nearest plug point. Attach a three-point plug to the cord.

**TIP:**

**IN THE INTEREST OF SAFETY CHECK ALL ELECTRICAL WORK WITH A QUALIFIED ELECTRICIAN.**
