

Stay safe

Now you can enjoy peace of mind with our world-class range of security products

KEEPING your home and family safe needn't be stressful. Cashbuild offers a variety of security products that are easy to install, making it much easier to secure your home for you and your family. From sturdy security gates and strong padlocks to motion-detector, spot- and floodlights, Cashbuild caters for most of your security needs.

LOCKS

Strong, good-quality locks are an important security measure. Padlocks are perfect for securing gates and a 60-mm brass padlock can be used to keep personal items of value safe. You can secure your business too – with the insurance padlock. This rectangular, solid brass, high-security padlock with a closed shackle will keep criminals away.

SECURITY GATES

Abracon security gates are an excellent deterrent against criminals and a good safety measure. Each gate carries a two-year guarantee and conforms to high quality standards. If you're handy with an electric drill it's relatively easy to install them yourself. Comprehensive instructions and the correct installation parts – including hinges, rivets and locking block – come with the gates.

LIGHTING

Outdoor motion-detector, spot- and floodlights are great for preventing your home getting invaded. With the Cashbuild motion-detector security lighting range you can even fool potential intruders into thinking someone's home when no one's there.

Motion-detector lights switch on whenever there's movement nearby, even when you're out and about.

It's highly recommended you install outside motion-detector lights separately and link them to the lights in one of the rooms inside your house to create the impression someone is home.

At Cashbuild you will find a wide range of outdoor lights and accessories for easy wall-mounting.

● **Daylight time switches** Place them in a shaded part of your garden and the built-in light sensor will automatically switch lights on at night and off during the day.

● **Halogen security floodlights** These provide effective lighting for paths, gardens and driveways.

● **Lantern fittings** Use them on exterior walls, such as at your front door or patio doors, and in driveways to provide a stylish touch while lighting up entrances.

● **PAR 38 twin spotlights** These are prewired and pre-assembled for easy

installation.

● Speak to a Cashbuild consultant at your nearest store to find out more about the best security solutions for you.
