

Protect and Enhance Wood with Medal Paints' Premium Wood Varnish

Wood is a timeless and versatile material used in everything from furniture to decking. However, without proper protection, it can deteriorate due to moisture, UV rays, and general wear. Medal Paints' Wood Varnish provides a durable, high-quality finish that enhances the natural beauty of wood while shielding it from damage.

Why Choose Wood Varnish?

Varnish is a transparent, hard protective finish that offers superior resistance compared to other wood treatments. Key benefits include:

Durability: Forms a tough, long-lasting barrier against scratches, spills, and abrasions.

UV Protection: Contains additives that prevent sun damage and fading (especially important in South Africa's harsh climate).

Water Resistance: Seals wood against moisture, preventing rot, warping, and fungal growth.

Aesthetic Appeal: Medal Wood Varnish is available in a high-gloss finish in a range of colours including Mahogany, Light oak, Dark oak and Teak.

Interior Wood Varnish

Best for:

- Furniture (tables, chairs, cabinets)
- Decorative woodwork (skirting boards, doors, and panelling)

Indoor varnishes prioritise aesthetics and moderate protection without needing extreme weather resistance. The product can also be applied to outdoor furniture.

Where to use Medal Paints' Wood Varnish range in your home

Medal Paints' Wood Varnish is perfect for:

Restoring Antique Wooden Furniture: Bring old pieces back to life while protecting them for years.

Protecting Wooden Doors & Windows: Guards against sun and rain damage, especially in Cape Town's variable weather.

DIY Wooden Craft Projects: Perfect for custom-made shelves, tables, or children's toys.

Whether you're preserving indoor furniture or shielding outdoor structures, Medal Paints' Wood Varnish delivers long-lasting protection and a beautiful finish. Always ensure proper surface preparation (sanding and cleaning) before application for the best results.
